# Main reforms

### **Main reforms**

#### Redesigning the statute of the Central Bank

|    | E |
|----|---|
|    |   |
|    |   |
| 01 |   |

Enhancing the independence of the BCT for achieving its objectives and conducting its main functions

02

Recognition of the role of the BCT and its contribution to maintaining financial stability and preventing systemic risk by enabling the Central Bank to act as lender of last resort and setting up a macroprudential oversight and financial crisis management committee

03

Enhancing the role of the Banking services Observatory to reshape it as a Financial Inclusion Observatory

#### Reshaping the Bank Act

### **Main reforms**

Tunisians have a preference for cash which has lead to an unprecedented increase in MCBs and

liquidity

a contraction of bank

Devising a national strategy for Financial inclusion by 2018-2022 BCT spearheads in-depth research on implementing a decashing and proposes an action plan for that purpose

Modernizing the legal framework for the emergence of new payment institutions

\*Promoting Digital Finance \*Developing Micro insurance \*Setting up a system for refinancing MFIs \*Building up a consensus culture on a solidarity-based and social economy \*Promoting financial literacy -lowering the threshold for cash transactions -promoting financial literacy -Developing the use of electronic equipment in public administrations

Introducing an regulatory and operational framework for operating as a payment institution

6

### **Challenges & Outlook** for banking regulations

3

2

Efficiency of the banking sector:

• Rationalizing the presence of government in the sector

- Improving the level playing field environment
- Reshaping the sector

#### 4

Improving the business environment:

- governance
- transparencey
- infrastructure

Long lasting strategy for NPLs

1

sector stability

### **CHALLENGES & OUTLOOK** FOR BANKING REGULATIONS

Need to rethink the role of government in the banking sector so as to find a middle path between the need to support public banks and the crucial need to promote competition on the banking marking, Reconfigure the physiognomy of the sector via concentration and the emergence of new banking models  $\bigcirc$ 

Developing digital finance

Conduct a De-Cashing strategy Enabling convergence of Tunisia's prudential regulations with Basel III standards by 2020
