

Business survey May 2020
Manufacturing industry, market services and construction

9 June 2020

Data collected from 27 May to 4 June 2020

Industry

Opinion on the outlook for industrial production*

- In May, industrial production rebounded across the board. This rebound was more marked in the sectors that were most affected in March and April: the automobile, rubber and plastic, textiles, and electrical equipment sectors. This rally nevertheless only partially offset the decline in activity recorded in the previous months.

Order books remained below normal levels.

Business leaders expect further growth in June, albeit at a slower pace.

Balance of opinions SA-WDA

Services

Opinion on the outlook for services activity*

- In the services sector, activity also picked up. The rebound was particularly pronounced in the car repair, personal services, transport and temporary work sectors. Little improvement was seen in the hotel and catering, consulting and advertising sectors, and the publishing sector lost ground.

Staff levels continued to decline.

Business leaders expect further growth in June, albeit to differing degrees across sectors.

Balance of opinions, SA-WDA

Construction

Opinion on the outlook for construction activity*

- The construction sector recovered some of its losses from March and April.

Order books continued to gain ground.

In June, activity is expected to improve further.

Balance of opinions, SA-WDA

* A positive (negative) balance of opinions corresponds to a rise (fall) in the evolution of activity. Balances of opinions may range from -200 to +200.

Notes :

- A positive (negative) balance of opinions corresponds to a rise (fall) in the corresponding variable.
- The last point corresponds to the business leaders' opinions of short-term production or activity forecasts.
- The series are revised on a monthly basis. These revisions take into account additional gross data and the evolution of the seasonal and working-day adjustment depending on the latest available data.
