

19 December 2019

## Performance of investment funds – France • October 2019

### Significant increase in the performance of equity funds

Boosted by equity funds (10.2% in October after 2.0% in September), the performance of non-monetary funds rises for the fifth consecutive month (6.1% in October after 2.6% in September). The increase concerns all fund categories, in particular employee savings funds (+4.7pp compared to September) and mixed funds (+3.1 pp). The performance of money market funds declines slightly to -0.25% in October.

(a) Annual performance net of management fees but before deduction of entry and exit fees commissions (cf. methodology).

(b) Except employees' savings funds (which are included in "Others funds")

(c) Exchange Trade Fund

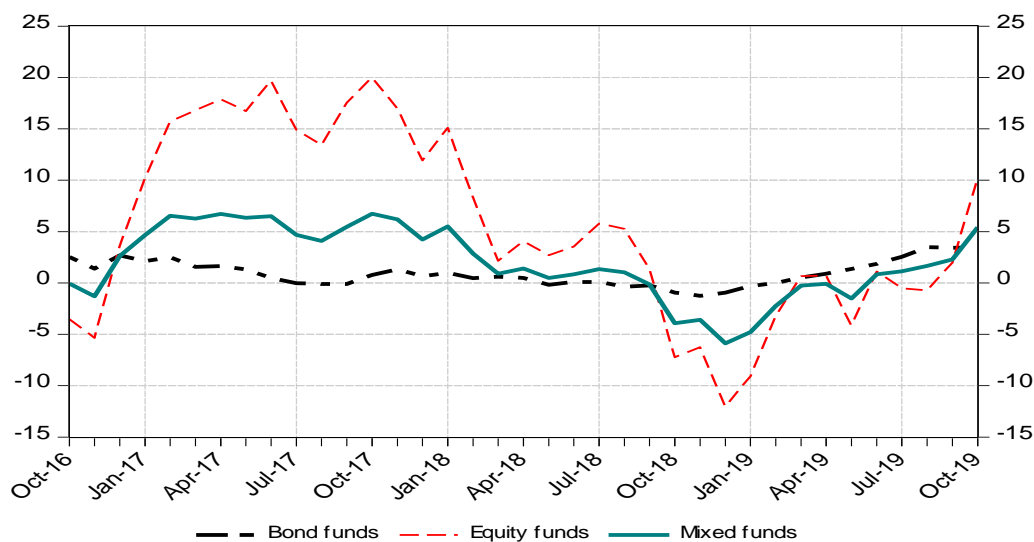

(d) Employees savings funds, real estate funds, Private equity funds, formula-based funds, hedge funds

(e) The term "mixed funds" replaces the term "diversified funds", AMF category that has been deleted since 31/12/2017; the criterion for classification remains the same.

(f) Outstanding amount and performance of real estate funds are taken into account as of June 2016

Additional information

The different categories of funds under review are defined by the Autorité des Marchés Financiers (AMF – French Financial Markets Authority). The classification of each fund is based on its real risk exposure. The definition of the exposure and the risk thresholds for each category are developed in AMF Instructions 2011-19, 2011-20 and 2011-21.

The **Stoxx 600 index** comprises 600 companies residing in 18 European countries.

The **Barclays index** comprises sovereign and quasi-sovereign bonds, corporate bonds and asset-backed securities. It includes securities denominated in 24 currencies, issued from developed and emerging markets. The rating of the securities is “investment grade” with residual maturity over one year.

The performance of the indices is measured by total return (price change and coupons/dividends reinvested). The yield spreads between these indices and the performance of UCITs in France reflect differences in composition and management orientation, in particular the split between highly liquid sovereign bonds issued by major advanced countries, less liquid sovereign bonds or bonds with a higher risk/return profile and bonds issued by private issuers. 6 month-Euribor and the performance of money market funds may also divert. This is due to differences in the composition of the interbank index and the money market funds’ portfolio (nature of the issuer, geographical diversification, average maturity, exchange rate effects linked to funds denominated in foreign currencies).
