## Performance of investment funds – France • December 2020

### In 2020, the annual performance of non-monetary funds stands at +1.2%

The annual performance of non-monetary funds stands at +1.2% for the full year 2020. The decline appears marked compared to 2019 (+11.5%), which was exceptional, and more relative when compared to the average annual performance over the last 10 years (3.6%). The equity and mixed categories record the best performances (3.0% and 2.1% respectively) while bond funds are stable (0.1%). With a decline of 3.0%, employee savings funds had not yet compensated at the end of the year for the declines in valuation suffered in particular in the second quarter. Over 10 years, their annual performance averaged 3.4%. The annual performance of money market funds, at -0.42%, appreciates in the context of the very accommodating monetary policy and in particular, the current rate of the deposit facility set at -0.50% (see graph P. 2).

#### Performance of Investment Funds by subsectors (a)

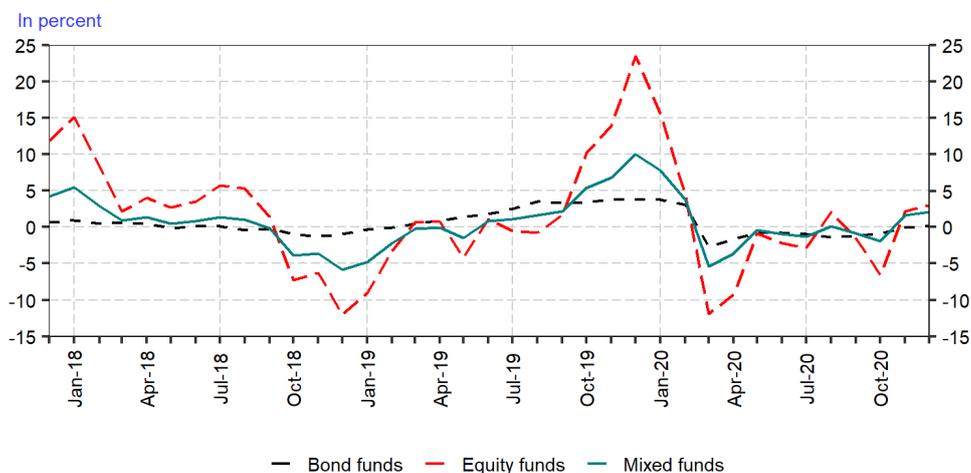

(percent, outstanding amounts : EUR billion)

	Annual performance			Monthly performance		Net asset value
	2019	November 2020	December 2020	November 2020	December 2020	December 2020
<b>NON MONEY MARKET FUNDS</b>	11.5	1.0	1.2	5.6	1.0	1336
<b>Equity funds (b)</b>	23.5	2.2	3.0	12.8	2.3	342
of which : ETF (c)	22.7	2.0	2.6	12.8	2.2	30
<b>Bond funds (b)</b>	3.8	0.0	0.1	0.8	0.2	290
<b>Mixed Funds (b) (e)</b>	10.0	1.6	2.1	4.8	1.2	350
<b>Other funds (d) (f)</b>	7.9	0.1	-0.6	4.0	0.2	354
of which employees' savings funds	13.4	-2.7	-3.0	9.5	0.1	142
<b>MONEY MARKET FUNDS (g)</b>	-0.27	-0.37	-0.42	-0.04	-0.04	393

## Additional information

The different categories of funds under review are defined by the Autorité des Marchés Financiers (AMF – French Financial Markets Authority). The classification of each fund is based on its real risk exposure. The definition of the exposure and the risk thresholds for each category are developed in AMF Instructions 2011-19, 2011-20 and 2011-21.

The **Stoxx 600 index** comprises 600 companies residing in 18 European countries.

The **Barclays index** comprises sovereign and quasi-sovereign bonds, corporate bonds and asset-backed securities. It includes securities denominated in 24 currencies, issued from developed and emerging markets. The rating of the securities is “investment grade” with residual maturity over one year.

The **Euro-MTS Index** is a euro-denominated bond index that measures the performance of the eurozone government bond market across all maturities of the underlying bonds combined.

The performance of the indices is measured by total return (price change and coupons/dividends reinvested). The yield spreads between these indices and the performance of UCITs in France reflect differences in composition and management orientation, in particular the split between highly liquid sovereign bonds issued by major advanced countries, less liquid sovereign bonds or bonds with a higher risk/return profile and bonds issued by private issuers. 6 month-Euribor and the performance of money market may temporarily divert. This is due to differences in the composition of the interbank index and the money market funds’ portfolio (nature of the issuer, geographical diversification, average maturity, exchange rate effects linked to funds denominated in foreign currencies).
